OBJECTIVES

I'm a passionate Flutter Developer who loves building high-performance, user-friendly mobile apps. I trained at ITI, completed hands-on training at Route Academy, and am now a trainee at DEPI, where I improve my skills through real-world projects. I focus on Flutter, Firebase, and APIs to build clean, scalable apps that deliver real impact.

EDUCATION

Nile University

Bachelor, Computer Science and Artificial Intelligence, GPA – 3.17   ***Sep 2022 – Jun 2026***

PROFESSIONAL EXPERIENCE

- **Flutter Trainee ,Information Technology Institute (iti) – ITI,**   **Aug 2025 – Oct 2025, Online**

  - Completed the Mobile Development using Flutter (120 hrs) program at the Information Technology Institute (ITI), covering end-to-end mobile development.
  - Developed multiple Flutter applications integrating Firebase and REST APIs, following clean code and responsive design practices.
  - Strengthened expertise in Dart, OOP, and state management, applying real-world problem-solving throughout the course.
- **Flutter Trainee ,Digital Egypt Pioneers Initiative – DEPI,**   **Jul2025 – Present, Hybrid**
  - Mastered Dart and OOP, transitioned to advanced Flutter development with a focus on application security and hardware interaction.
  - Developed a comprehensive portfolio and platform profiles, applying "Catching" skills to craft successful client proposals for enhanced remote work readiness.
  - Directed the ongoing team development of the capstone project (Fitness App) while cultivating essential Soft Skills for effective teamwork and project management.
- **Flutter Trainee ,Route Academy**   **Jun 2024 - May 2025, Online**
  - Mastered Dart and OOP, then progressed to Flutter, executing multiple static and interactive UI projects to build a strong widget foundation.
  - Developed complex apps (News, Evently, Movie) integrating APIs, advanced Firebase, local storage, and implementing Cubit/Provider for state management.
  - Led the capstone project (Movie App) by independently integrating all features, and implemented Clean Code and Dependency Injection principles in the E-commerce application

CERTIFICATIONS

- Flutter Trainee ,Information Technology Institute - ITI
- Flutter App Developer, Route Academy
- Cybersecurity Academy (Undergraduate Level 2025), National Telecommunication Institute –NTI
- Full Stack Web Development using PHP, National Telecommunication Institute –NTI

PROJECTS

- **Islamy App**   **Sep 2025 – Sep 2025**
  - Engineered a cross-platform Islamic application providing six core utilities, including Qur'an reader, Hadith explorer, and accurate prayer time tracking.
  - Integrated external APIs (for prayer times and audio) and SharedPreferences for local data persistence (Tasbeeh, last read Surah).
  - Optimized performance and architecture by implementing Cubit/Provider for State Management and ensuring responsive design across devices.

- **Movie App (Route)**   **May 2025 – Jul 2025**
    - Developed a Movies App using Flutter with Clean Architecture, MVVM, and BLoC for scalability.
    - Implemented authentication, advanced search, and user profile management features.
    - Designed a responsive UI with localization support for multi-device, global accessibility
- **News App,**   **Apr 2025 - Jun 2025**
    - Developed a real-time news app using Flutter and integrated a public News API for dynamic content.
    - Implemented category-based filtering, in-app search, and theme/language switching.
    - Applied MVVM architecture and state management for clean, scalable code.

SKILLS

- **Programming & Tools**: Dart, C, C++, Java, MySQL, GitHub, Flutter, API, Firebase, State Management, Clean Code, Python.
- **Machine Learning:** Supervised & Unsupervised Learning, Model Selection, and Data Preprocessing.
- **Data Analysis:** Data Structuring, Model Evaluation, and Result Interpretation.
- **Interpersonal Skills:** Management, Organization Skills, Problem Solving, Communication, Teamwork.
- **Languages:** English , Arabic
