

Eslam Ashraf Shawky

Flutter Developer

6th of October City, Giza, Egypt | +201014500784 | eslamashraf6102@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

I'm a Flutter Developer specializing in building scalable cross-platform mobile applications using Flutter, Dart, Firebase, and REST APIs. Skilled in Clean Architecture, MVVM, and BLoC to create high-performance, maintainable, and user-focused applications. Trained through DEPI, ITI, and Route Academy, with practical experience delivering responsive mobile solutions and implementing modern development practices. Passionate about building impactful products and collaborating with engineering teams to deliver production-ready mobile applications.

EDUCATION

B.Sc. Computer Science and Artificial Intelligence — Nile University

Sep 2022 – Jun 2026

- GPA: 3.35 (Very Good)
- Graduation Project — Excellent with Honors: 2nd place at UGRF; selected among Top 10 graduation project posters university-wide.

PROFESSIONAL EXPERIENCE

Flutter Trainee — Digital Egypt Pioneers Initiative (DEPI)

Jul 2025 – Dec 2025, Hybrid

- Mastered Dart and OOP, transitioned to advanced Flutter development with a focus on application security and hardware interaction.
- Developed a comprehensive portfolio and platform profiles, applying “catching” skills to craft successful client proposals for enhanced remote work readiness.
- Directed the ongoing team development of the capstone project (Fitness App) while cultivating essential soft skills for effective teamwork and project management.

Flutter Trainee — Information Technology Institute (ITI)

Aug 2025 – Oct 2025, Online

- Completed the Mobile Development using Flutter (120 hrs) program at the Information Technology Institute (ITI), covering end-to-end mobile development.
- Developed multiple Flutter applications integrating Firebase and REST APIs, following clean code and responsive design practices.
- Strengthened expertise in Dart, OOP, and state management, applying real-world problem-solving throughout the course.

Flutter Trainee — Route Academy

Jun 2024 – May 2025, Online

- Mastered Dart and OOP, then progressed to Flutter, executing multiple static and interactive UI projects to build a strong widget foundation.
- Developed complex apps (News, Evently, Movie) integrating APIs, advanced Firebase, local storage, and implementing Cubit/Provider for state management.
- Led the capstone project (Movie App) by independently integrating all features, and implemented Clean Code and Dependency Injection principles in the E-commerce application.

PROJECTS

Confidential Digital Healthcare Platform (Graduation Project, Nile University) · Sep 2025 – Jun 2026

- Contributed to the development of a cross-platform healthcare system with integrated intelligent features.
- Participated in designing scalable system architecture and secure data handling mechanisms.
- Collaborated within a team to deliver a full-stack solution following modern development practices.
- Worked on integrating advanced technologies to enhance system functionality and user experience.
- Ensured performance, usability, and reliability across multiple platforms.

Fitness App — Graduation Project (DEPI) · [GitHub](#) · Nov 2025 – Dec 2025

- Developed a comprehensive fitness application supporting authentication, workout tracking, progress metrics, scheduling, and audio features.
- Implemented Clean Architecture with MVVM and Provider for scalable application structure.
- Integrated Hive local database for efficient offline data persistence.
- Led the development team, coordinated project planning, and delivered a production-ready application.

Movie App (Route) · [GitHub](#) · May 2025 – Jul 2025

- Developed a scalable movie application using Clean Architecture and MVVM principles.
- Implemented authentication, advanced search functionality, and user profile management.
- Designed responsive user interfaces with localization support for multiple language.
- Applied BLoC state management to improve application scalability and maintainability.

Islamy App · [GitHub](#) · Sep 2025 – Sep 2025

- Built a cross-platform Islamic application featuring Quran reading, Hadith browsing, prayer times, and digital Tasbeeh.
- Integrated external APIs for prayer time calculations and audio streaming.
- Implemented SharedPreferences to persist user preferences and application data.
- Applied Provider and Cubit for efficient state management and responsive UI design.

News App (Route) · [GitHub](#) · Apr 2025 – Jun 2025

- Developed a real-time news application consuming public REST APIs.
- Implemented search functionality, category filtering, localization, and theme switching.
- Applied MVVM architecture and state management to ensure maintainable application structure.
- Designed responsive user interfaces optimized for multiple device sizes.

TECHNICAL SKILLS

Flutter & Mobile: Flutter, Dart, Responsive & Adaptive UI, MVVM, Clean Architecture.

State Managemen: BLoC, Cubit, Provider.

Backend & APIs: Firebase (Authentication, Firestore, Real Time database), REST APIs, Dio.

Databases & Storage: MySQL, SQLite, SharedPreferences, Hive.

Programming Languages: Dart, C, C++, Python, Java.

Development Practices: OOP, Debugging, Performance Optimization, Version Control (Git/GitHub).

UI/UX & Design: Figma (Design-to-Code), Responsive Design.

CERTIFICATIONS & TRAINING

- Cross-Platform Mobile App Developer (Flutter Track) — Digital Egypt Pioneers Program (DEPI)
- Flutter Trainee — Information Technology Institute (ITI)
- Flutter App Developer — Route Academy
- Certificate of Participation, 21st Undergraduate Research Forum, Nile University, Egypt (Project: MediVault) — Jan 2026
- Cybersecurity Academy (Undergraduate Level 2025) — National Telecommunication Institute (NTI)
- Full Stack Web Development using PHP — National Telecommunication Institute (NTI)

LANGUAGES

Arabic: Native | English: B1

SOFT SKILLS

Leadership · Teamwork · Problem Solving · Communication · Organization · Fast Learning
